Projects

Car-Rental-Website

Here i build a car rental app using Next.js, React, Tailwind CSS, GraphQL, HyGraph, and TypeScript. We will start by setting up our project & installing the necessary dependencies. Then, create GraphQL schema & API. Next, build our React components and connect them to GraphQL API.
✔ High performance and smooth navigation with Next.js.

Portfolio-Website

This personal portfolio website will contains the personal information, skills, work experience or portfolio, clients details and contact section with fully function contact form.This contact form will send the enquiries to your email address. This react portfolio website can help you to showcase your work experience on online website.
✔ using Next-Js & TypeScript ,Tailwind-CSS...

Twitter-Clone

- 1.Designed and developed a Twitter clone using Next.js and Tailwind CSS, Firebase , showcasing expertise in modern web development frameworks and responsive design principles.
- 2.Implemented real-time features and user authentication, providing an interactive and secure user experience, while optimizing performance for seamless browsing.

I Hereby declare that the information furnished is true to the best of my knowledge and belief.
